

# ARI TEMPLUG BUILDING PLUG

A SAFE & COST EFFECTIVE  
SOLUTION TO PROTECT DWV PIPES  
DURING CONSTRUCTION

Easy to fit & cost effective way to prevent building waste entering DWV pipes whilst minimizing trip hazards.

## Protect from blockages

DWV pipes get blocked with construction waste ranging from sawdust to concrete.

These blockages are not evident until the building is occupied, causing flooding, significant cost and reputational damage to the builder.

TemPlugs protect the DWV pipe systems throughout the construction process & are easily removed using a scraper.

## Reduce site hazards

DWV pipes present on site hazards.

These pipes are often broken by workers to make access easier, creating trip and injury risks.

The TemPlug provides a cost effective and easy to install solution, removing these hazards.

## Quick and easy to fit

Easy installation:

- 1) Cut the pipe level with the slab using a reciprocating saw.
- 2) Select appropriately sized TemPlug
- 3) Apply Liquid nails or like to the underside of TemPlug and position / fit.

Available in standard DWV pipe sizes with custom orders possible.
